NEWS FOR IMMEDIATE RELEASE

**Amtec Communications Installs State-of-the-Art Voice over IP (VoIP)
Telecommunications System For Steinberg Diagnostic Medical Imaging**

LAS VEGAS — March 10, 2004 — Amtec Communications, an industry leader in telecommunications, announced today that it recently installed a state-of-the-art Voice over IP (VoIP) telecommunications system for Steinberg Diagnostic Medical Imaging (SDMI), Las Vegas' premier radiological and imaging company. The sophisticated and technologically advanced installation was conducted in each of SDMI's four facilities and will provide for future expansion.

"The transition to VoIP is a significant investment for us and one that impacts not only our employees but also all of our patients," said Don Shackley, CIO of Steinberg Diagnostic Medical Imaging. "We analyzed the services of several leading providers including Cisco, Avaya, and Mitel and chose Amtec Communications because of their technical expertise and their ability to customize a telecommunications solution that will benefit us now and well into the future. The installation went incredibly smooth and we were extremely pleased with their professionalism and technical guidance."

After a thorough analysis of SDMI's current infrastructure, Amtec Communications installed Mitel's 3300 Integrated Communications VoIP Platform throughout the company, which consisted of over 300 IP appliances and several state-of-the-art call center applications. The Mitel system is a cutting edge voice and data application that will provide greater functionality, enhance efficiency and significantly reduce costs. With Amtec Communications' assistance, SDMI is planning on tapping

into the capabilities of the Mitel system by developing custom applications that will report vital company statistics directly to the desktop.

“We conducted an in-depth evaluation of their business over a period of several months, gathering crucial information on how patients and employees interacted with one another,” said Russ Goeckner, president of Amtec Communications. “Once we had a clear understanding of their business we designed a system that achieved their goals and objectives. Our significant experience with VoIP made SDMI’s transition seamless. We’re excited to partner with SDMI and provide them with our leading services.”

ABOUT AMTEC COMMUNICATIONS

With offices in Las Vegas and San Bernardino, Amtec Communications has been providing businesses with solutions to their communications needs since 1982. Amtec's products incorporate a complete line of business communications systems remarkably engineered to meet the needs of today’s fast paced business world.
